

The John Howard Society of Alberta
Incorporated 1949

This video is intended to arm individuals reentering the community with valuable information they may need to stay healthy once they are out.

The information will cover three major subjects:

- 1) What are HIV, Hep C and STIs, how do you get them, and how can you stay safe.
- 2) What is harm reduction and how can you practice HR techniques if you revert to using when you are out.
- 3) What kinds of services are available in the community when you get out: where can you stay, eat, where can you get ID, or clean needles.

Through interviews with inmates, the video provides solid information, explodes myths and addresses some of the common fears of those about to leave the institution. It talks to former inmates about the biggest risk factors an exiting prisoner faces, and what resources might be available in any community to help overcome them.

Funding for this publication/multimedia project was provided by the Public Health Agency of Canada. The opinions expressed in this video are those of the Filmmaker and do not necessarily reflect the official views of the Public Health Agency of Canada.
